Category/ Drug Class	Other Considerations
Autoimmune and Hepatitis C *	For some clients, an Indication-Based Formulary will be utilized for products in these classes and may result in additional products not covered without a medical exception.
Drugs for Infusion Into Spaces Other Than the Blood	A drug that must be infused into a space other than the blood will generally not be covered under the prescription drug benefit.
Generics	Limited source generics may be evaluated when appropriate and potentially not be covered without a medical exception.
Hyperinflation	On a quarterly basis, products with significant cost inflation that have clinically appropriate and more cost-effective alternatives may be evaluated and potentially not be covered without a medical exception.
New-to-Market Agents ¹	New-to-market products and new variations of products already in the marketplace will not be added to the formulary immediately. Each product will be evaluated for clinical appropriateness and cost-effectiveness. Recommended additions to the formulary will be presented to the CVS Caremark® National Pharmacy and Therapeutics Committee (or other appropriate reviewing body) for review and approval.
Specialty	As new specialty products launch, as well as quarterly throughout the year, CVS Caremark will re-evaluate existing specialty products to determine appropriate formulary placement, which includes potentially not covering without a medical exception, adding back or deleting these products.

The listed formulary options are subject to change.

- ^ Drug products are identified by unique numerical product identifiers, called National Drug Codes (NDC), which identify the manufacturer, strength, dosage form, formulation and package size.
- * This list indicates the common uses for which the drug is prescribed. Some drugs are prescribed for more than one condition.
- 1 If your doctor believes you have a specific clinical need for one of these products, he or she should contact the Prior Authorization department at: 1-855-240-0536.
- 2 For use in patients previously treated with an HCV regimen containing an NS5A inhibitor (for genotypes 1-6) or sofosbuvir without an NS5A inhibitor (for genotypes 1a or 3).
- 3 If approved for coverage and prescribed for primary prevention of cardiovascular disease, may be covered without cost sharing through an exceptions process.
- 4 Rebranded or private label formulations are not covered without a prior authorization for medical necessity (i.e., RELION).
- 5 BD ULTRAFINE syringes and needles are the only preferred options.
- 6 An ACCU-CHEK blood glucose meter may be provided at no charge by the manufacturer to those individuals currently using a meter other than ACCU-CHEK. For more information on how to obtain a blood glucose meter, call: 1-877-418-4746.
- 7 ACCU-CHEK brand test strips are the only preferred options.
- 8 Listing reflects the authorized generics for TESTIM and VOGELXO.
